CTX5C-IP-AD-TUR-S2FW
5MP AI DUAL ILLUMINATION ACTIVE DETERRENT TURRET CAMERA

Functions

Siren and Light Active Deterrence

This siren and light active deterrence network camera supports light alarm and voice alarm when perimeter events occur, to provide deterrence and effective intervention. The camera has built in voices for selection, and supports customised voice import.

Smart Dual Illuminators

Smart Dual Illuminator technology adopts smart algorithms to detect targets. Usually, the IR illuminator is on at night; when the target appears in the monitoring area, the warm light is on, and the camera records full-colour video and information of key events. The camera links snapshots and videos with full-colour image. When the target is out of the monitoring area, the warm light is off and the IR illuminator is on, which reduces light pollution.

SMD

With intelligent algorithms, Smart Motion Detection technology can categorise targets that trigger motion detection and filter the motion detection alarm triggered by non-concerned targets to provide effective and accurate alarms.

One-tap Disarming

One-tap disarming functionality is convenient and easy for operation. Users can close and recover the event linkage function remotely on their phones.

Cyber Security

Includes security authentication and authorisation, access control protocols, trusted protection, encrypted transmission and encrypted storage. These technologies improve the camera's defense against external cyber threats and prevent malicious programs from compromising the device.

Protection (IP67, wide voltage)

IP67: The camera passes a series of strict test on dust and soak. It has dust-proof functionality, and the enclosure works as normal after soaking in 1m deep water for 30 minutes.

Wide voltage: The camera allows ±30% input voltage tolerance (wide voltage range), and it is widely applied to outdoor environment with unstable voltage.
