

ListenIR Infrared Receiver

Part No. **LR-4200-IR**

Overview

- A compact high performance IR receiver offering best-in-class sensitivity and range.
- Includes connections for an LA-430 neck loop c/w with DSP loop driver for use with hearing aids to provide an enhanced listening experience.
- Smallest device of its kind - easy to wear and use and for venues to dispense, store and maintain.
- OLED display shows channel, battery status, channel status, volume level and more.
- Lanyard and belt clip options offer convenient and discreet choices for the end user.
- Advanced rechargeable battery technology eliminates the costs and hassles associated with frequent battery replacement.
- Designed for single-channel applications.
- Charging options include the LA-423-02 4-Port USB Charger and the LA-381-02 12-way 'drop-in' Charging Tray.

More Information
