Pro Surveillance Tower XL (6m) - Viper NDA A

Introducing a cost effective solar powered CCTV solution, the Pro Surveillance 6m towable CCTV tower, has been specifically developed and designed as a cost-effective solution, for demanding off-grid security applications. This offers a truly reliable, robust and versatile alternative, when mains or generator power are not available.

Specification

- 6m tower height when deployed
- Fully towable – mast height reduces to 3.25m for transportation
- Dimensions of tower 1350mm square, add 2m square for solar panel frame and panels (standard double panel set up)
- Powder Coat finish in RAL9003 White (semi-gloss) as standard
- Optional Base colours available in select RAL Colours*
- Tower Livery/ Decals/ Logo/ Graphics/ Chevrons (optional)*
- Ground anchor lugs for wire rope fastening to each corner of tower
- Adjustable levelling legs – suitable for uneven ground/ rough terrain
- Batteries (Lithium 100ah) 2 x 13.5kg (approx. total 26kg)
- Solar Bracket Frame & parts approx. 58kg (includes anti-climb)
- Solar panels x 2 approx. 21kg each
- Total weight approx. 520kg (depending on final specification)
- Option to install Spirafix ground anchor for additional hold*
- Option to add quad solar panel arrangement for extended Winter use*
- Installation and Set-Up is available at an additional fee & can be quoted on request*
- **Delivery charges apply to all orders and will be quoted depending on postcode**

* To be quoted on request
