

# MotionProtect Jeweller

Wireless indoor IR motion detector.

An Ajax hub is required for operation. Find the detailed information on the device by the link:

<http://ajax.systems/support/devices/motionprotect/>

## Key features

- Up to 12 m detection distance
- Pet immunity
- False alarms prevention algorithm
- Remote control and setup via the app
- 88.5°/80° viewing angles
- Temperature compensation
- Effortless installation and replacement
- Connecting via QR code

## Angles and range

# False alarm prevention

MotionProtect Jeweller combines special optics and software to filter false alarms. When professionally installed, the detector ignores pets and doesn't react to the most common sources of false alarms.

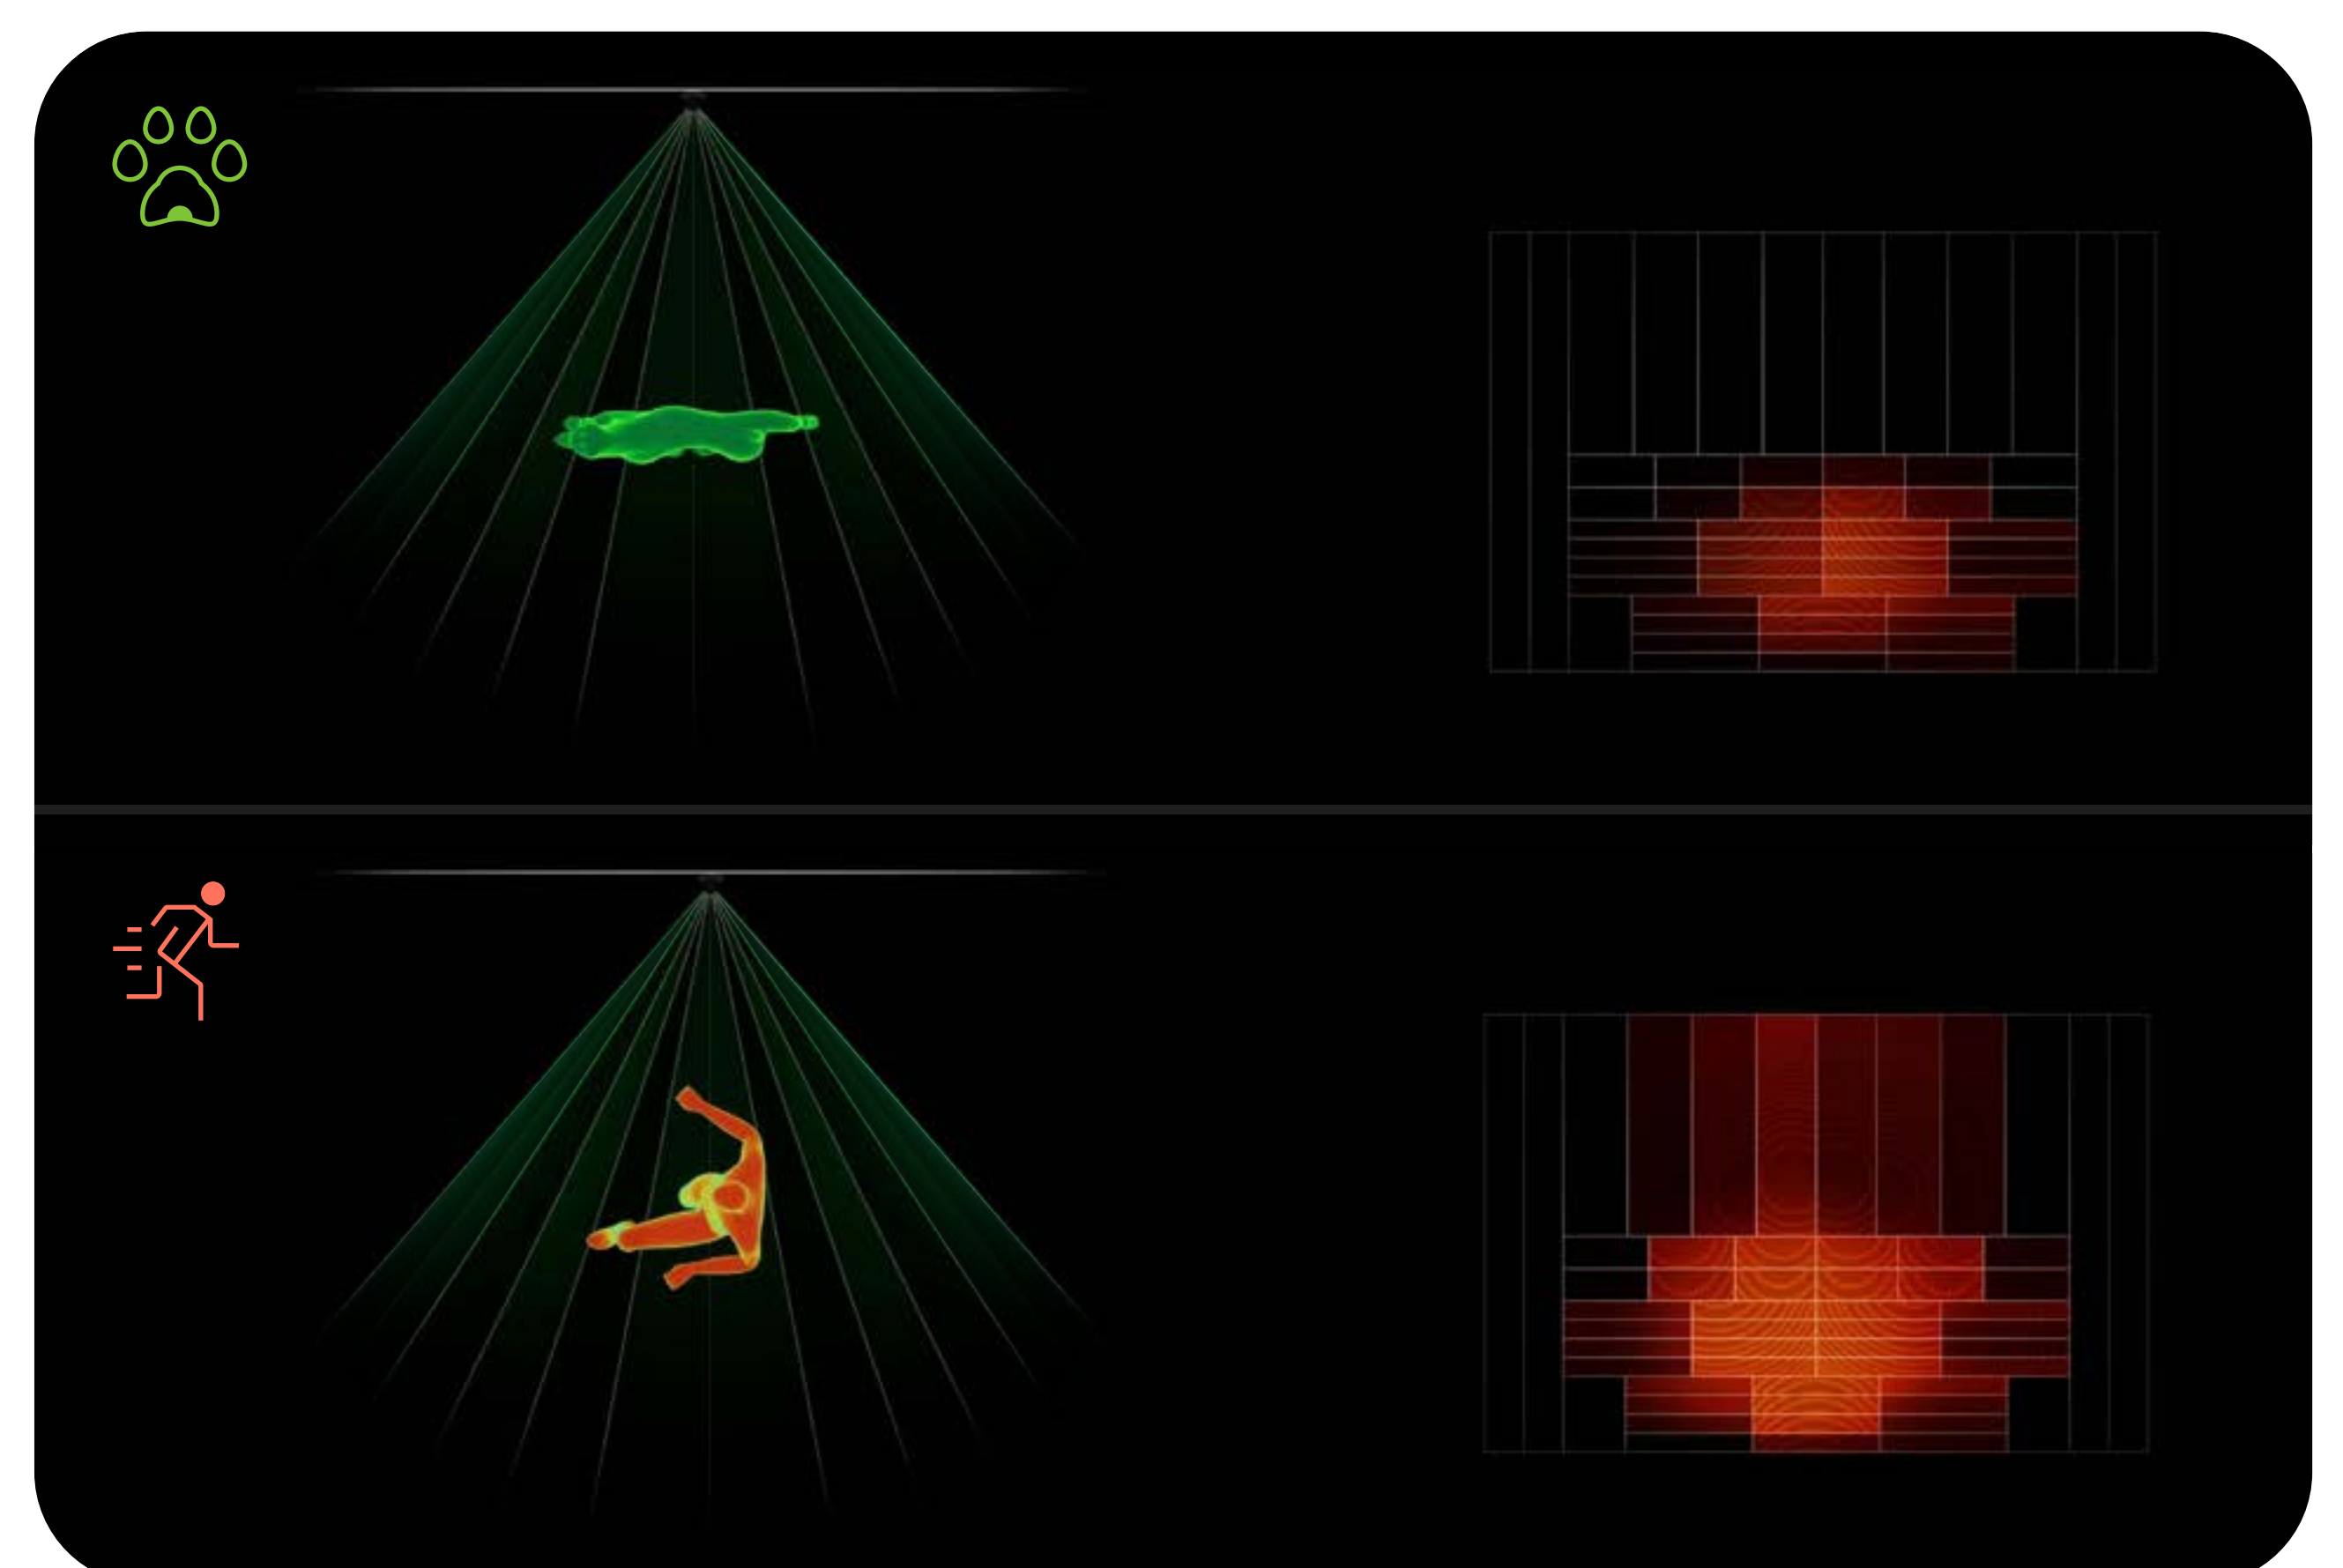

## Optics

The detector lens increases sensitivity to human motion, cutting off false alarms to other sources of IR radiation. It is designed so that potential IR radiation from pets and other interferences affect only the small lens sections. Large sections, on the contrary, are aimed at the most likely places of burglar motion.

## Software

For additional protection against false alarms, the detector uses the SmartDetect algorithm. The armed detector constantly analyses the thermal diagram from the PIR sensor: the intensity of IR radiation, the size of the thermal spots, the speed of movement and other parameters.

## Installation

When properly installed and configured, the detector does not react to common sources of false alarms and pets under 50 cm tall and 20 kg in weight. For seamless installation, it has pre-installed batteries and the SmartBracket mounting panel. So, installers don't need to disassemble the detector and won't damage the electronics during installation.

# Jeweller

communication technology

**Jeweller** is a **two-way wireless protocol** that provides fast and reliable communication between hubs and devices. The protocol delivers instant data-rich alarms: security companies and users know which device was triggered, when and where it happened.

Jeweller features **encryption** and **authentication** to prevent forgery, and **polling** to display devices' status in real time. Supporting **up to 1,700 m** of wireless connectivity, Jeweller is ready to protect facilities and deliver **the best user experience** for both end users and installers.

Up to 5 years of operation on pre-installed battery

Up to 1,700 m of two-way encrypted wireless communication between hub and detector

## Technical specifications

Compliance with standards	<b>EN 50131 (Grade 2)</b> <b>PD 6662:2017</b>	Compatibility	<b>Hubs</b> all Ajax hubs  <b>Range extenders</b> all Ajax radio signal range extenders
