

PowerManage Management Platform & ConnectAlarm App

Unlock the Full Potential of Your Security System Offering

PowerManage is a unique service management platform that enables central monitoring, management and control of security systems. PowerManage comes with flexible panel integrations and supports IQ Panels – like IQ Panel 4, IQ4 Hub, IQ4 NS – as well as DSC PowerSeries Neo and PowerSeries Pro.

Maintaining systems with PowerManage is easy with ConnectAlarm, a powerful app available for both iOS and Android devices. Give customers complete control over their security systems from anywhere with an intuitive interface that empowers users to manage their security settings, receive real-time notifications and ensure their home or business is always protected.

Why PowerManage?

Key Remote Management Capabilities:

Reduce costs through enhanced remote diagnostics, fault analysis, security system management and more.

- **Remote Routine Inspection (RRI)**
- **Remote Configuration** of system and devices
- **View System Connectivity type** and status
