

PowerManage

Security Management Platform

Commercial

With flexible installation options, local or cloud-based, customers can maintain full control over their data

The PowerManage management platform is a revolutionary solution designed to streamline the monitoring, management and diagnosis of multiple alarm systems. With PowerManage, end-users can effortlessly oversee their security systems through a single intuitive interface

PowerManage's versatile and robust set of features are designed to accommodate a diverse range of customers – from residential users and small business owners to large enterprise installations and central monitoring stations. The platform is engineered to deliver flexible options that are as straightforward or advanced as the customer requires.

Flexible Installation Options

PowerManage can be installed in a cloud environment, locally on premise or on dedicated hardware and virtual machines. This flexibility allows customers to build their own service platform and maintain full control over their data.

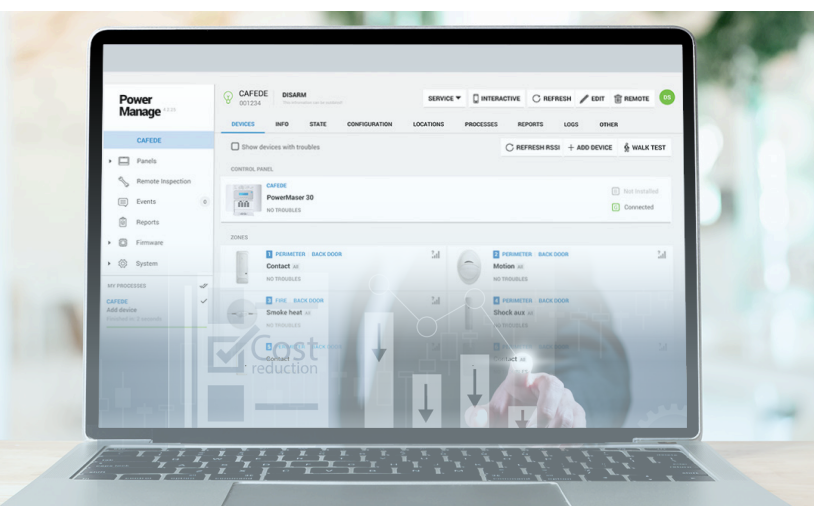

Seamless Integration with IQ and DSC System

PowerManage empowers dealers to offer an extensive selection of panels to their customers. Dealers can continue offering their most popular DSC PowerSeries Neo and PowerSeries Pro devices while introducing the latest 4th Generation IQ Panel solutions.

Comprehensive Technical and Interactive Service Solution

PowerManage is designed to enhance technical support productivity and minimize the need for customer visits. It combines a robust technical management center with interactive service software providing a comprehensive platform for managing and supporting technical operations.

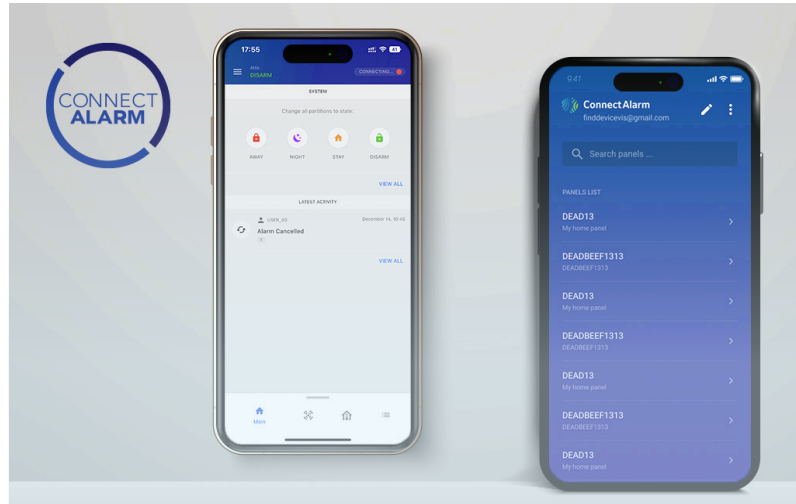

Efficiency and Cost Savings

Save time and reduce operating costs with the easy-to-use PowerManage interface and advanced features such as automatic redundancy and panel configuration history. PowerManage's comprehensive range of technical management capabilities available makes maximizing your customer's system easy and worry free.

ConnectAlarm Mobile App

The ConnectAlarm mobile app is an integral part of the PowerManage system. ConnectAlarm gives customers direct remote access to their security system, enabling residential and commercial customers of all sizes to monitor and control their home or business security system from wherever they are.

Key Remote Management Capabilities

Save time and costs with enhanced remote diagnostics, fault analysis, and security system management:

- Remote Routine Inspection (RRI)
- Remote configuration of system and devices
- View system connectivity type and status
- Remote arm/disarm of the system
- Remote battery status check of the system and all connected devices
- Remote inspection of wireless connection
- View event logs
- View reports of system activity
- Remote provision of selected new devices
- Remote provision of new/replacement keyfobs

Residential

Give your customers more freedom and value with the easy-to-use ConnectAlarm mobile app.

Alarm Install Mobile App

The Alarm Install mobile app is a security system management tool that provides installers convenient configuration of alarm systems from a mobile device or tablet. You can configure the security panel either on site or from a remote location, which reduces response time significantly.

IP Receiver

Security system reporting protocols	SIA / IP, Fibro
Security system reporting encryption	AES-128
Automation software communication	MLR2 (CID/SIA) protocol over RS232 or TCP/IP
Security systems supervision (keep alive)	Configurable intervals
Notification dispatcher	E-mail and push notifications
Redundancy	Hot standby (HP model only)
Events history per system	255
Image storage	Local storage

Johnson Controls

Johnson Controls is a leader in the diversified technology and multi-service industry globally with a wide range of customers in over 150 countries. Our 120,000 employees create smart buildings, energy-efficient solutions, integrated infrastructures and next-generation transportation systems that work harmoniously together to deliver on the promise of creating smart cities and communities. The commitment to sustainability has been demonstrated since the company was founded in 1885 with the invention of the first electric room thermostat.
